# PRIME HARVEST

The stunning Prime Harvest collection is crafted from select and premium grade Appalachian hardwood for a smoother, consistently beautiful floor. Make this versatile style your own, with designs to complement any decor, from classic to contemporary.

## Variety of Options

The widest selection of species, widths and colors means it's easy to choose one that coordinates with your furnishings or color scheme.

## Premium Lumber

Whether you choose a species with a strong grain, or subtle grain, higher grade hardwood has fewer knots and streaks so the floor is even and consistent throughout a room.

## Lifetime Warranty

Flooring comes with our Lifetime Finish for lasting scratch, stain and wear resistance — and this durability is backed by our Lifetime Warranty.

## Ruggedly Durable

The beautifully rustic hand-scraped visual provides the added benefit of easily hiding everyday wear. Coupled with a strong, protective finish, American Scrape is an ideal choice for busy households.

## Premium Solid Hardwood

Cold weather in the Appalachian Region makes for tighter, more consistent graining and less color variation than hardwood sourced from other regions. Choose from 100% solid Oak, Hickory or Maple in 3-1/4" or 5" widths.

## Engineered for Versatility

Choose engineered wood where solid can't be installed — like in basements or over concrete floors. American Scrape engineered features a variety of species in premium 5-3/4" width and 1/2" thickness.

## Made in the USA

Solid hardwood flooring is built using superior craftsmanship and high-grade Appalachian hardwood — for planks that are consistent in color and less likely to warp or bow over time.
