# PRO PLUS

The new Pro Plus collection takes the stylish appearance of COREtec and toughens it up for high traffic residential, or even commercial use. The rigid core features special top and bottom layers for stability, and is constructed from a high-density composition for extra rigidity, providing superior dent and impact resistance. Since COREtec is 100% waterproof, COREtec Pro Plus floors can be installed in wet areas and will never swell when exposed to, or even submerged in water. COREtec is also dimensionally stable, so it will not expand or contract under normal conditions, and never needs expansion strips in large rooms. Each COREtec Pro Plus plank or tile has an attached cork underlayment for a quieter, warmer vinyl floor that is naturally resistant to odor causing mold and mildew. All styles in the COREtec Pro Plus Collection feature the patented COREtec® technology.

## Plank Dimensions:

7.2" x 48.03" x 5 mm

## Sq. Ft./Carton:

28.84

## Construction:

Heterogeneous

## Edge Profile:

Micro Bevel

## Core:

Enhanced Vinyl Product (EVP)

## Attached Underlayment:

Vinyl

## Installation Method:

Float, Direct Glue

## Installation Level:

Above, On, Below

## Residential Warranty:

Limited Lifetime

## Structure Warranty:

Limited 10 Year Light Commercial

## Waterproof Warranty:

Limited 10 Year Light Commercial

## Petproof Warranty:

Limited 10 Year Light Commercial

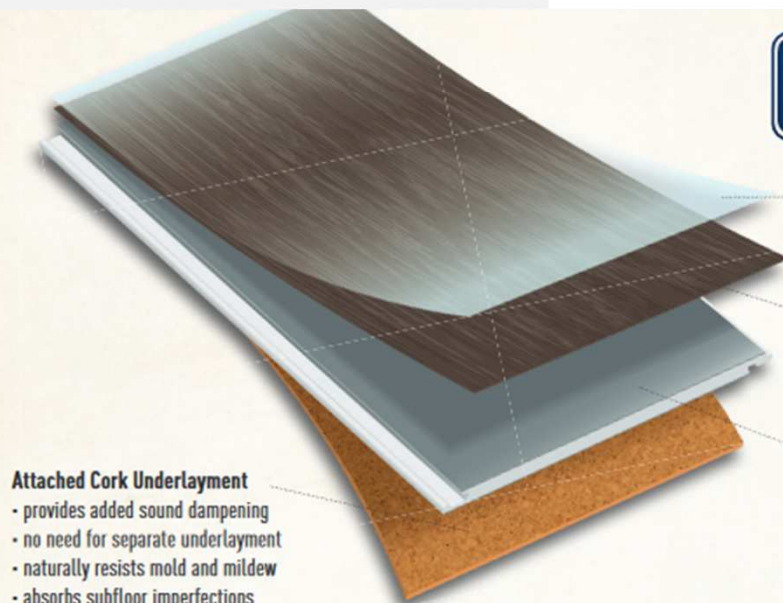

## Commercial Warranty:

Limited 10 Year Light Commercial

## Environmental Certifications:

GreenGuard (Certification, Gold, Private Label) Certified

## High-Density Rigid Core

### Attached Cork Underlayment

- provides added sound dampening
- no need for separate underlayment
- naturally resists mold and mildew
- absorbs subfloor imperfections

### 20 mil Wear Layer

- protects against excessive wear
- superior cleanability and stain resistance
- rated for commercial traffic

### Vinyl + Print Film

- good quality image
- enhances durability

### Rigid Core

- features special top/bottom layers for stability
- high calcium carbonate content for extra rigidity
